1. Introduction

"Socialism was established through action" is a summary of the achievements of socialist countries in the world in revolution, construction and reform. Its connotation mainly refers to the spirit of seeking truth and being pragmatic, and the spirit of hard work is the advanced nature of Marxist parties. Dialectical materialism believes that knowledge originates from practice and acts on practice, and the purpose of knowing the world is to transform the world. Marx once pointed out: "Philosophers just interpret the world in different ways, and the problem is to change the world." Marxism pays particular attention to the practical character of theory, not only committed to scientifically "interpreting the world", but also actively committed to "changing the world." Socialism is a theory, a system, and even more a practice. To transform socialist theory and system into reality, the key lies in the practice and establishment of the Chinese socialist system and the successful construction of socialism. Marx once said: "Labor is the first need of human beings. If any nation ceases to work, it will perish within a few weeks, not to mention a year." It is precisely because generations of people have worked tirelessly for it. The cause of socialism can continue to move forward.

To deeply understand the rich connotation of this great call, at least three points should be grasped: First of all, the establishment of the socialist system through revolutionary means is a ruthless criticism of capitalism. Only through the actual activities of changing the world, and breaking through the blockades of vested interests. Discovery a new world in the criticism of

the old world is not empty slogans. Secondly, socialist construction must rely on human labor and must meet the people's ever-increasing needs for a better life. Just talking about it is not enough. This requires efficient execution to overcome various factors that hinder the free and comprehensive development of people. Finally, socialist "doing" is not a random activity that violates the laws of social and historical development, but a practical exploration under the guidance of scientific theory. It is not only a practice to regulate the relationship between man and nature, but also a relationship between man and man.

Labor relations the life and death of the nation and the country, "Socialism is done" reflects the principle of labor first. Practice is the only criterion for testing truth. At the special time of the forty years of reform and opening up, General Secretary Xi Jinping put forward the great call for "doing hard work". In addition to affirming, there are incentives and spurs.

Give full play to the party's leading role in "doing" the cause of socialism. Party, government, military and civilian studies, east, west, south, north, middle, the party is leading everything. General Secretary Xi Jinping emphasized: "Whether to implement it directly reflects the purpose, awareness and party spirit of leading cadres." Real hard work is the inherent characteristic of our party. At the same time, hard work is a yardstick to test the working ability of party members and cadres. The working ideas, abilities and performance of leading cadres can be reflected in practice, and they can be tested by practice. The people recognize and support the standards. "It is better to open your arms than to open your voice." Party members and cadres must firmly establish the ability to panic crisis awareness, continue to strengthen their learning and skills, use theoretical knowledge to guide practical work, and continuously improve their ability to analyze and solve problems in practical work. At the same time, it is necessary to improve the supporting mechanism for selecting and appointing people, so that the majority of party members and cadres are willing, capable, and successful, and create a clean and upright political ecology for good and pragmatic cadres.

Give full play to the main role of the masses of the people in "doing" socialism. "Socialism was established through action ", this is a requirement for all Chinese people, not a requirement for

party members and cadres. The masses of the people are the creators of history and the main body of practice for the great cause of socialism with Chinese characteristics.
